- Slides are very nice - but with a lack of pictures to "illustrate" the contents;
- Do not use " Δ " to represent partial derivatives " ∂ "
- Do not read out every term in the equation
- Zemmmsky is just a name of one thermodynamic book - the relation you've referred to, arises from fundamental thermodynamic;
- S-T effect (or throttling process) is related to the variation of temperature with respect of pressure at constant enthalpy.
